DEEP DIVES

moonshotai/Kimi-K3

huggingface

Moonshot AI released Kimi-K3, a trending model on Hugging Face. The model is an image-text-to-text transformer with 9104 likes and 387,822 downloads. Developers can use this model for various applications, including image and text generation. The model's popularity and download count indicate its potential for real-world applications.

Why it matters. Kimi-K3 is a state-of-the-art model that demonstrates the capabilities of image-text-to-text transformers. Its release and popularity can inspire new applications and research in the field.

TRY THIS

Experiment with Kimi-K3 using the Hugging Face API to generate images and text.

Claude-account

hackernews

A developer built a small CLI tool to switch between Claude Code accounts without logging in again. The tool, called Claude-account, simplifies the process of managing multiple accounts. The developer's motivation was to solve a personal problem, and the result is a useful tool for others.

Why it matters. Claude-account demonstrates the potential for automation and streamlining of workflows using AI tools. Its release can inspire other developers to build similar tools for their specific needs.

TRY THIS

Explore the Claude-account repository and consider contributing to or building similar tools for your own workflow.

QwenAudio/qwen-audio-agent

github

QwenAudio released an open-source audio agent that provides a real-time voice runtime for AI agents. The agent is designed to keep agents talking, working, and present. The release of this agent can facilitate the development of voice-based applications and research.

Why it matters. The QwenAudio agent is a significant contribution to the field of AI and voice technology. Its release can enable new applications and research in areas such as voice assistants and voice-based interfaces.

TRY THIS

Experiment with the QwenAudio agent using the provided documentation and examples.

WHAT PEOPLE ACTUALLY BUILT

Show HN: Gander, an Android file viewer that asks for no permissions at all

hackernews

The developer built an Android file viewer that can open various file types without requiring any permissions.

How it works. The file viewer uses a custom implementation to handle different file types, ensuring that no permissions are required.

STEAL THIS

The developer's approach to building a permission-free file viewer can be applied to other areas of Android development, promoting a more secure and private user experience.

<https://github.com/mokshabl1r/gander>

Show HN: Edgemetry – self-hosted web analytics on Cloudflare's free tier

hackernews

The developer built a self-hosted web analytics tool that runs on Cloudflare's free tier, providing a private and cost-effective solution for tracking website traffic.

How it works. The tool uses Cloudflare's edge computing capabilities to collect and analyze website traffic data, ensuring that the data remains private and secure.

STEAL THIS

The developer's approach to building a self-hosted web analytics tool can be applied to other areas of web development, promoting a more private and secure online experience.

Agent-Manager: A Tmux TUI for Running Claude Code, Codex and OpenCode HACKERNEWS

A terminal-based user interface for managing AI agents, providing a simple and efficient way to interact with multiple agents.

<https://github.com/YoanWai/agent-manager>

bybit-exchange/kaas GITHUB

A knowledge-base compiler that turns notes, documents, and transcripts into a queryable Markdown wiki, providing a powerful tool for organizing and searching knowledge.

<https://github.com/bybit-exchange/kaas>

Zazza/svoi-oss GITHUB

A self-hosted, open-source personal AI assistant that provides a streaming chat interface, long-term memory, and task management capabilities.

<https://github.com/Zazza/svoi-oss>

DavidAU/Qwen3.6-27B-Fable-Fusion-711-Uncensored-Heretic-NM-DAU-NEO-MAX-MTP-GGUF HUGGINGFACE

A trending model on Hugging Face that provides a powerful tool for text generation and other NLP tasks.

<https://huggingface.co/DavidAU/Qwen3.6-27B-Fable-Fusion-711-Uncensored-Heretic-NM-DAU-NEO-MAX-MTP-GGUF>

2001z/llm-engineering-platform GITHUB

A production-oriented LLM engineering platform that provides a comprehensive set of tools for building, deploying, and managing LLMs.

<https://github.com/2001z/llm-engineering-platform>

Vladimir-Human/ru-marketplace-mcp GITHUB

A Russian marketplace MCP server that provides access to multiple marketplaces, including Wildberries, Ozon, and Yandex Market.

<https://github.com/Vladimir-Human/ru-marketplace-mcp>

HezaoHezao/poirot GITHUB

A deep research agent kernel that provides a powerful tool for building and managing AI agents.

<https://github.com/HezaoHezao/poirot>

enowdev/succubus GITHUB

A cross-agent coordination tool that enables multiple AI agents to work together seamlessly, providing a powerful tool for building complex AI systems.

<https://github.com/enowdev/succubus>

casioreview20-glitch/forgo-os GITHUB

An open-source control plane for AI agents that provides a comprehensive set of tools for managing and orchestrating AI agents.

<https://github.com/casioreview20-glitch/forgo-os>

DannilydST/sorftime-seller-agent GITHUB

A free AI-powered Amazon product research and marketplace intelligence tool that provides a powerful tool for sellers and researchers.

<https://github.com/DannilydST/sorftime-seller-agent>

cookyman74/llmwiki-harness GITHUB

A tool for building and managing LLM-based wikis, providing a powerful tool for knowledge management and organization.

<https://github.com/cookyman74/llmwiki-harness>

zhiweio/data-driven-ai-guide GITHUB

A guide for teaching data engineers how to think about AI, providing a comprehensive resource for learning about AI and data engineering.

<https://github.com/zhiweio/data-driven-ai-guide>
