DEEP DIVES

sv-number/mcp-server

github

The developer sv-number created an MCP server for AI agents that need a phone number. This server allows for ordering a private number in over 200 countries and reading the SMS verification code. The project provides the widest country coverage in its category and can be checked with one API call.

Why it matters. This project is significant because it addresses a specific need for AI agents, providing a solution for phone number management. It also highlights the importance of MCP servers in AI development.

TRY THIS

Explore the MCP server API documentation to understand how to integrate it into your AI projects.

i3T4AN/KADATH

github

The developer i3T4AN built an evolutionary multi-agent runtime called KADATH. This runtime breeds, evaluates, and improves autonomous agents across reproducible epochs to converge on optimization of a goal.

Why it matters. KADATH is important because it provides a framework for evolving and optimizing autonomous agents, which can be applied to various AI applications.

TRY THIS

Investigate the KADATH documentation to learn about its architecture and potential use cases.

davidahmann/fde-guide

github

The developer davidahmann created an open-source forward deployed engineering guide for production AI systems. This guide covers value, architecture, evaluations, security, deployment, and operations.

Why it matters. This guide is valuable because it provides a comprehensive resource for developing and deploying production-ready AI systems.

TRY THIS

Review the guide's sections on architecture and evaluations to improve your understanding of AI system development.

WHAT PEOPLE ACTUALLY BUILT

Show HN: Pane – An open-source browser that turns your work into living websites

hackernews

The developer abhishek-verma built an open-source browser called Pane, which turns work into living websites. Pane is designed to be comprehensive like an autonomous agent while removing the need for hundreds of integrations.

How it works. Pane works by utilizing a unique approach to browser functionality, focusing on turning work into living websites. The exact technical details are not provided, but the project is open-source, allowing for further exploration.

STEAL THIS

The idea of turning work into living websites can be applied to various projects, and exploring open-source browsers like Pane can provide inspiration for innovative solutions.

<https://github.com/abhishek-verma/Pane>

Show HN: Decant – Understand how you spend tokens

hackernews

The developer dosu-ai built a tool called Decant, which helps understand how tokens are spent. Decant provides insights into what tokens are used for, such as context gathering, planning, code, chat, etc.

How it works. Decant works by analyzing token usage and providing a breakdown of how they are spent. The exact technical details are not provided, but the project is open-source, allowing for further exploration.

STEAL THIS

Understanding token spending can be crucial for optimizing AI projects, and tools like Decant can provide valuable insights.

QUICK HITS

meta-models/Muse-Glimmer-30B HUGGINGFACE

A trending model on Hugging Face for image-text-to-text tasks.

<https://huggingface.co/meta-models/Muse-Glimmer-30B>

yangzc/ainote GITHUB

An open-source AI agent workflow platform with visual flow orchestration and knowledge base RAG.

<https://github.com/yangzc/ainote>

OpenLabs-so/openanalytics GITHUB

An open-source, privacy-first web analytics platform with revenue attribution and an MCP server.

<https://github.com/OpenLabs-so/openanalytics>

MiniMaxAI/MiniMax-H3 HUGGINGFACE

A trending model on Hugging Face for image-text-to-video tasks.

<https://huggingface.co/MiniMaxAI/MiniMax-H3>

YINGLINGH/limioryn GITHUB

A high-level edge-cloud AI multi-agent framework for real devices.

<https://github.com/YINGLINGH/limioryn>

sosoj92/jarvis-assistant-vocal GITHUB

An assistant vocal local en francais with domotique Hue, OBS, agenda, navigateur, appels Twilio, serveur MCP.

<https://github.com/sosoj92/jarvis-assistant-vocal>

Qwen/Qwen3.8-2.4T-A95B HUGGINGFACE

A trending model on Hugging Face for text generation tasks.

<https://huggingface.co/Qwen/Qwen3.8-2.4T-A95B>

larryvrh/MiniMax-H3-Turbo-Lora HUGGINGFACE

A trending model on Hugging Face for text-to-video tasks.

<https://huggingface.co/larryvrh/MiniMax-H3-Turbo-Lora>

deepseek-ai/DeepSeek-V4-Flash-0731 HUGGINGFACE

A trending model on Hugging Face for text generation tasks.

<https://huggingface.co/deepseek-ai/DeepSeek-V4-Flash-0731>

Lightricks/LTX-2.5 HUGGINGFACE

A trending model on Hugging Face for image-to-video tasks.

<https://huggingface.co/Lightricks/LTX-2.5>

matonhp5108/Opencodex GITHUB

A free, open-source coding agent inside VS Code.

<https://github.com/matonhp5108/Opencodex>

Show HN: Aileaks – scan repos for leaked LLM reasoning-trace secrets HACKERNEWS

A tool to scan repositories for leaked LLM reasoning-trace secrets.

<https://github.com/sarthakuwar/aileaks>

raullenchai/twinspace GITHUB

A production-grade recipe for DeepSeek-V4-Flash-0731 on 2x NVIDIA DGX Spark.

<https://github.com/raullenchai/twinspace>

z15114664687-dot/hr-onboarding-agent GITHUB

An open-source AI-assisted HR onboarding platform for Feishu/Lark.

<https://github.com/z15114664687-dot/hr-onboarding-agent>

irzix/nestjs-agentic GITHUB

The NestJS-native runtime for governed AI agents.

<https://github.com/irzix/nestjs-agentic>

Mftrferdinand/Zerolinear GITHUB

Zerolinear — AI research lab and home of the Zeline open-source agentic AI framework.

<https://github.com/Mftrferdinand/Zerolinear>
