WHAT PEOPLE ACTUALLY BUILT

Show HN: Build with Python – a beginner course where your code draws

Show HN

Hi HN, I built this because I watched my daughter struggle at learning Python. I made something that runs only in the browser with visuals rather than relying on CLI/terminal output. No need to worry about python installation, package versions, venv etc. The lab runs with Pyodide

Baloo: self-hosted AI code review for GitHub PRs, MIT licensed

r/selfhosted

I built Baloo because reviewing the code our coding agents produced was becoming a bottleneck. It runs as your own GitHub App. You choose which repositories it can access and provide the model credentials. Baloo reads the diff and surrounding code, checks repository conventions f

I built a simple skills for lightweight Spec-Driven development workflow

r/LLMDevs

I made yet another skills kit for Spec-Driven development. I felt like managing tons of markdown files is very overwhelming for me, so I decided to make compact and simple one file solution called one-plan-skills . I personally developed it for me and deiced to share with the com
