Show HN: OpenChart – OSS TradingView alternative with your own AI agent

Show HN

Hi HN, I'm Weilun, cofounder of OpenChart. We built OpenChart because we wanted Claude and Codex to interface with the markets, like most of humans do, through charts rather than through CLIs. With your existing AI plans, your agent can work directly with your charts: annotate a setup, write an indi

Why it matters. Flagged by the ranking heuristics as a real, artifact-backed build.

WHAT PEOPLE ACTUALLY BUILT

Show HN: I turned my iPhone and a $20 smart plug into an f-stop timer

Show HN

I am a film photographer and do some darkroom printing and always wanted one of the proper, advanced f-stop timers, but never really wanted to spend a couple hundred dollars on one. Eventually I figured my phone was already perfectly capable of doing the timing, it just needed a

Show HN: MailAccess – the true Email OSINT framework

Show HN

Im a security engineer and i built mailaccess. When i started learning pentesting, i came across multiple lectures and notes of people listing out tools and websites, which gives the emails for a particular domain, and almost all of them mentioned that the tool might not stick, s

Show HN: TerrainSR – fast, realistic heightmap upscaling model

Show HN

This is a model that I made for a historical game. I wanted to have a 1:1 scale model of Europe, but my problem was that 100m data was too low-res while 10m LIDAR data was patchy, took hundreds of GBs to store and was full of manmade objects like mines, buildings and so on. I tra
