I built a daily word game in 12 days. The base mechanic only took an hour. Getting it to the finish line took the rest. The work was in iteration: design, polish, juice, character. Taste, for now, is still relevant. Enjoy!

I built an open source framework for building RL environments. Named "Seahaven" after the fake town in The Truman Show.

I've been optimizing long-running agents: rewriting their prompts, tools, skills and subagents, and keeping the changes that score better. I've been working on some version of this problem for over a decade (at Apple, my own startup, now Kiln). The hard part is the eval environme
