WHAT PEOPLE ACTUALLY BUILT

Show HN: WallHop – 12ft.io is gone, so I built a replacement

Show HN

Hi HN, I'm Josh. WallHop is a free paywall bypass: paste an article URL (or prefix any URL with wallhop.io/) and you get the readable article without the paywall popup, ads or clutter. No signup, no extension. I built it after 12ft.io went away. The News Media Alliance took it do

Show HN: iTerm2 System Monitor Widget

Show HN

I didn't know that you can build snippets for iTerms's toolbelt. Now I know. And I built a small but wholesome system monitor which I was always missing as a sysop-dude: - CPU/memory usage - network traffic - open ports - file system moitor - folder size watch dogs for common cac

https://github.com/nickyreinert/iTermSysMon

I made an open-source benchmark which measures the complexity of code added (overengineering/tech debt). Looking for feedback and contributors.

r/LLMDevs

Existing benchmarks measure the solve rate and token output/cost, but don''t punish excess code, which makes the codebase harder to work with in the long term. I wanted to measure this as it is especially useful for long term projects. Method: It takes the patches that benchmarks
