Show HN: Spotatui, a Spotify TUI/GUI without web API rate limits

HN

About 11 months ago i revived the amazing but unfortunately unmaintained spotify-tui. Since then I have been working on it almost non stop, finding a lot of problems on the way. One of the main issues I ran into were the Spotify web API rate limits. Third party clients like spotatui are dependent on

Why it matters. Flagged by the ranking heuristics as a real, artifact-backed build.

https://blumify.io/people

I made a pixel-art dungeon to keep an eye on all my coding agents: Claude Code, Codex, Kiro, Gemini CLI (free, open source)

r/LLMDevs

I usually have several coding agents running at once, and not all of them are the same tool. Some are Claude Code, some Codex, sometimes Kiro or Gemini CLI. I kept losing track of which one was waiting for me, so I built Agents Pixel Dungeon: a small native app (macOS and Linux)

https://www.reddit.com/r/LLMDevs/comments/1x58qog/i_made_a_pixelart_dungeon_to_keep_an_eye_on_all/

I built an open-source Claude Code skill that generates interactive, scientifically sourced biology figures

r/LLMDevs

I built Anima, a Claude Code skill that turns natural-language biology requests into detailed, interactive visualizations. Instead of generating an image, the agent follows a workflow: research the mechanism, identify relevant structures, build isometric SVG geometry, implement i
